RoboMarkets
THE FUTURE OF INVESTING

"Leverage up to 1:2000" Program

RoboMarkets
THE FUTURE OF INVESTING

General provisions

Any client with a real trading account at RoboMarkets Global Ltd can participate in the program.

Increased leverage (1:2000) is offered on MT4/MT5-based ProCent and Pro accounts, including Copy Trader MT4 accounts.

The increased leverage is available only if the account equity does not exceed 10,000 USD or its equivalent in the account's currency.

In case the Equity on the trading account with the increased leverage exceeds the numbers specified above, leverage will be automatically reduced to 1:1000. Once Equity falls below the numbers specified above, clients may reapply for the increased leverage in their Members Area.

Weekend restrictions for real accounts, from 11:00 PM (EET) Friday to 1:00 AM (EET) Saturday:

- The increased leverage for all accounts is automatically reduced to 1:1000.
- Clients of RoboMarkets Global Ltd cannot change their usual leverage to the increased leverage during this period.
- New accounts cannot be registered with increased leverage.

After 1:00 AM (EET) on Saturday, leverage is automatically restored to the previous value.

Important condition: RoboMarkets Global Ltd reserves the right to deny increased leverage to any client without providing reasons and/or advance notice.

Please note that if there are any changes in leverage on the MT4/MT5 trading accounts, all margin parameters in your trading terminal will be displayed according to the previous leverage value until you re-login to your trading terminal.

We recommend re-logging into your trading terminal after any leverage adjustments to ensure all margin parameters are displayed correctly.
